

The Discovery Center Student & Educator Quotes 10-11

Did The Discovery Center experience make a difference in your life?

“Before I came to Discovery Camp I would judge people before I met them. But now I know that my first judgment isn’t always the right judgment, and I could have a great friend if I don’t judge people at my first encounter.”

Bennett Student-2010

“I lost my prejudice when I was doing my Alpha Beta program. I learned not to judge people by just looking at them. Get to know them.”

Scotland Student-2010

“I didn’t know Aimee so much. But when I got back from Discovery, I knew Aimee like a sister. Discovery brings people together.”

Noah Webster School-2010

“My group of friends gets more and more diverse every time I come to the Discovery Camp.”

Bennett Student-2010

“Diversity can enrich our lives by being able to meet different people.”

Scotland Student-2010

“We learned about every subject we needed to know, and how discovery brought people who were not so close—closer.”

Troy Mitchell II-Noah Webster School-2010

“This experience allows the students to get to know one another and to gain an understanding which will ultimately reduce stereotypes and prejudice.”

Hayley Fieldhouse-Langford School-2010

“They learned to accept and appreciate each other’s difference and see past them to create friendships.”

Michelle Kramer-Eastbury School-2010

“My students learned how to interact in a multicultural environment. Also they learned how to become leaders.”

Jose Soto-Sanchez-Hartford-2010

“It was a great opportunity for student to not only talk about diversity, but to actually experience how important it is to respect all cultures and work as a team. I could not have done these diversity activities with my class since they basically are all from the same culture.”

Debbie Gemme-Nayaug School-Glastonbury-2010

The Discovery Center Mission

The mission of The Discovery Center is to shape positive attitudes about race and differences, reduce isolationism between urban and suburban /rural schools, and improve math, science, and language arts skills.
